GENERAL INFORMATION REGARDING THE INDUSTRY AND POSSIBILITIES OF DEVELOPMENT.

The Lumbering Industry of the Protectorate is mainly in the hands of the Forestry Department, and the chief source of supply at present is the Minzira Forest in South Buddu.

Lumbering operations are also carried on by manual labour in the Budongo Forest, Bunyoro, and in the Savannah Forest, Busoga.

Exploitation is also being carried on by private enterprise under licence.

3. MINERALS.

MINERAL PRODUCTION AND INVESTIGATION.

There is at present no mineral industry in Uganda except native salt working, and iron smelting and the quarrying of "Noni" or kaolin for whitewash, and also the usual quarrying of gravel and road metal and of lateritic iron-stone for building.

At Kibero the natives won 66,555 lbs. of Grade II salt, and only 30 lbs. of Grade I salt. At Katwe no Grade I salt was obtained and the quantities of Grades II and III salt were 713,510 and 3,091,075 lbs. respectively. The high level of the water in Lake Katwe is said to be the cause of the lowering of the quality of salt from there, and it contains, besides sodium chloride, sodium carbonate and sulphate.

No figures are available as to the quantity of iron smelted by natives.

The Public Works Department has used 38 tons of Noni (kaolin) during the year. No limestone was quarried. Also unmeasured quantities of building stone and gravel, and clay for brickmaking have been made use of.

The area, of which a geological survey has been made, is now 9,003 square miles, of which 1,635 square miles is more or less detailed work.

A memoir on "Petroleum in Uganda" was sent to the press and will appear early in 1925.
